# AI & Metaverse strategy

## AI infrastructure demand surges as trade risks recede and corporate adoption rises

- Global equity markets rose in July, supported by US trade deals and strong earnings start
- The strategy outperformed the global equity market, led by strength in AI infrastructure
- Added to AI infrastructure exposure; exited select semiconductor, software, and auto names

**Pauline Llandric, James Dowey**  
**co-Portfolio Manager, AI & Metaverse Strategy**

### What's happening?

Global equity markets were strong in July, the MSCI All Country World Net Total Return Index returning 1.4% in USD terms. Markets benefitted from improved investor sentiment and reduced risks of a trade wars following announcements of US trade agreements, including with Japan and the EU. The US administration also passed the OBBBA (One Big Beautiful Bill Act), which may help support US economic growth in the quarters ahead.

Within AI, the second quarter earnings season got underway during the month, delivering a strong increase in hyperscaler capex plans, with estimates for calendar year 2025 capex by Microsoft, Google, Amazon, Meta, Oracle and Coreweave collectively up 11% during the month from \$356bn to \$394bn and for calendar year 2026 up 22% from \$376bn to \$460bn.

This build is now being underpinned by explosive inference demand, training demand no longer shouldering the burden on its own. This is a much healthier situation and reflects positively on the key question of the return on investment for AI that has accompanied AI capex during the past couple of years.

For example, OpenAI's ChatGPT reached around 700 million weekly active users as at the end of July, up from around 400 million in February this year, while Google processed 980 million AI inference tokens in July, double the rate of 480 million in May and almost 100x the rate of around 10 million in early 2024. Indeed, boosted by accelerating enterprise AI demand, Google Cloud saw revenue growth accelerate to 32% year-on-year in Q2 from 28% in Q1, while Microsoft Azure and other cloud services saw revenue growth accelerate to 39% for the quarter from 33% in the previous quarter.

AI-related revenues further downstream remain a much more mixed picture, with the unmistakable signs of disruption emerging alongside opportunity. For example, while AI innovators like Palantir and ServiceNow (both held in the strategy) are seeing AI-driven revenues accelerate, bell-weatheres in software and services, from Adobe to Accenture are experiencing stock declines as they fail to demonstrate enough benefit from AI to offset the growing risks of encroachment from competitors harnessing AI to deliver offerings at significantly lower cost.

## Portfolio positioning and performance

The AI & Metaverse strategy outperformed the MSCI All Country World Index during the month. We believe active investment management is essential in these conditions and our strategy captures opportunities across both AI infrastructure (enablers) – companies enabling the use of AI – and AI innovators (applications) – companies using AI. During July, both sub-themes contributed positively to the strategy's return with AI infrastructure the stronger of the two, contributing about three-quarters of the strategy's return.

Within AI infrastructure, the biggest positive contributors were Nvidia, AMD and Arista Networks, all three companies benefitting from the aforementioned growth in AI capex plans. Nvidia's supply chain issues earlier this year are now solved enabling strong shipments of Blackwell GPU solutions, while AMD's product slate for 2026 looks increasingly encouraging. Furthermore, both companies will be able to ship to China once again, following the removal of recently introduced US government restrictions.

The biggest detractors in AI infrastructure were ARM, ASM and Confluent. All three companies faltered after reporting earnings during the month. ARM articulated a slightly weaker short-term outlook than expected based on smartphone and IoT weakness, but we remain confident in its structural drivers, while ASM suffered alongside other semiconductor production equipment providers from Chinese demand expectations. Confluent reported a disappointing further deceleration in cloud revenues caused in part by a large customer switching to an in-house solution.

Within AI innovators, the biggest positive contributors were Roblox, Palantir and Synopsys. Roblox reported results well ahead of expectations as its hit game Grow-a-Garden – now one of the most successful games in history – helped drive 51% sales growth year-on-year. We see an excellent opportunity for Roblox as the leading modern game platform to use AI for game development and discovery to enhance its position. Palantir posted impressive results in early August with revenue growth accelerating to 48% year-on-year from 39% year-on-year in the first quarter, driven in particular by US commercial up 93% year-on-year, reflecting we believe the coming strength in enterprise AI usage and Palantir's trailblazing position in helping companies deploy AI. Synopsys benefitted during the month from clarity around its ability to sell EDA products in China following recent uncertainty from US government restrictions and the official closing of its acquisition of Ansys.

The biggest detractors in AI innovators were Spotify, Procept Biorobotics and Netflix. Spotify and Netflix reported earnings displaying encouraging business performance and remain strategically well positioned as AI innovators, however, they somewhat missed very high expectations for earnings, having had a good run in recent months. Procept fell during the month as it announced a CEO transition, however we remain optimistic on the opportunity for their robotic solution for prostate surgery.

In terms of market capitalisation, the strongest part of the overall market was mega-cap with MSCI ACWI companies with market capitalisation over \$500bn returning 5.2% in USD terms during the month. This was largely due to the aforementioned strength of demand for AI infrastructure. The strategy is underweight mega-caps based on its next generation approach, nevertheless the strategy's mega-cap holdings outperformed those of the benchmark during the month, returning 6.6% in USD terms.

During July we initiated positions in Datadog, Oracle, Credo Technology and Amphenol. We believe Datadog represents an underappreciated opportunity within AI infrastructure software, enabling companies to monitor and manage AI models and agents and demonstrating a strong revenue growth contribution from AI native customers. Oracle has seen a strong recent improvement in the strategic prospects for its cloud infrastructure business through its partnership with OpenAI, which we believe will enable it to participate strongly in the AI infrastructure in the years ahead. Credo Technology holds leadership in active electrical cables for usage within the scale-out of AI compute and a growing opportunity for them in optical solutions, while similarly Amphenol has exceptional strengths in datacenter networking and connectivity equipment.

During the month, we sold Qualcomm, SK Hynix, ASM, Mongo DB, Tesla, and CyberArk. Despite Qualcomm's positive diversification from mobile phone semiconductors into broader faster growing areas such as automotive and IOT we believe we can access better structural AI exposure in other semiconductor companies, which we implemented by increasing our weight in Nvidia. Likewise, for Micron and ASM, we see better current opportunities elsewhere in AI infrastructure, particularly in the case of SK Hynix given the strong run year to date for memory stocks.

We held more significant concerns about Mongo DB leading us to sell our holding, having seen a sharply more competitive environment within databases, including the recent strong growth of open-source Postgres, which we believe could weigh on growth. Likewise, we held growing concerns around slowing autos sales and the current quality of management execution at Tesla. Finally, we sold CyberArk, the privileged access and identity security provider, after Palo Alto announced an agreement to acquire the company at a 26% premium.

## Outlook

Market sentiment is improving as trade agreements are largely being settled well below the worst possible outcomes and the risks of trade wars are receding. That said, there remain important details yet to be confirmed on a number of the agreed deals and, of critical importance, a deal with China is required before we can definitively move beyond this period of tariff uncertainty.

In the meantime, during earnings season so far, we have generally seen resilience of company results, which is reassuring, and companies driving success through AI in particular are being well rewarded.

The economic outlook for the second half of the year remains a key question for investors as policy uncertainty created so far this year may yet leave its mark on the economy. However, we are confident that the structural drivers unleashed by AI will produce strong business and stock performance for those companies on the right side of this theme

## Investment Strategy

Our strategy of investing in companies across AI infrastructure and AI innovators provides a diversified approach to capturing the gains of AI. We believe AI is a once-in-a-generation general purpose technology with high return on investment (ROI) opportunities across the whole economy. We are focused on investing in companies that can deliver superior stock returns by unlocking these opportunities and possessing strong barriers to competition.

We believe the accelerating use of AI in the economy so far this year underlines the strong potential of the investment strategy. At the same time, whilst most – if not all – companies will use AI in the coming years, not all will win through AI. Indeed, many will be disrupted by its emergence, as we believe is beginning to be reflected in the stock market. As such, we believe an active and dynamic investment approach to AI is essential, as we implement in this strategy.

**No assurance can be given that the AI & Metaverse strategy will be successful. Investors can lose some or all of their capital invested. The Metaverse is subject to risks including Equity; Emerging Markets; Global Investments; Investments in small and/or micro capitalisation universe; Investments in specific sectors or asset classes; ESG; Investment through the Stock Connect program.**

Past performance is not a guide to current or future performance, and any performance or return data displayed does not take into account commissions and costs incurred when issuing or redeeming units. The value of investments, and the income from them, can fall as well as rise and investors may not get back the amount originally invested. Exchange-rate fluctuations may also affect the value of their investment. Due to this and the initial charge that is usually made, an investment is not usually suitable as a short term holding.

In Singapore, this document is issued by AXA Investment Managers Asia (Singapore) Ltd. (Registration No. 199001714W) and is intended for the use of Institutional Investors only as defined in Section 4A of the Securities and Futures Act (Cap. 289) and must not be relied upon by retail investors. Circulation must be restricted accordingly.

This document has been issued by AXA Investment Managers Asia (Singapore) Ltd (ARBN 115203622) ("AXA IM Asia"). AXA IM Asia is exempt from the requirement to hold an Australian Financial Services License and is regulated by the Monetary Authority of Singapore under Singaporean laws, which differ from Australian laws. AXA IM Asia offers financial services in Australia only to residents who are "wholesale clients" within the meaning of Corporations Act 2001 (Cth).

For Japanese clients: AXA Investment Managers Japan Ltd., whose registered office and principal place of business is at NBF Platinum Tower 14F 1-17-3 Shirokane, Minato-ku, Tokyo 108-0072, Japan, which is registered with the Financial Services Agency of Japan under the number KANTOZAIMUKYOKUCHO (KINSHO) 16, and is a member of Japan Securities Dealers Association, Type II Financial Instrument Firms Association, Investment Trust Association of Japan and Japan Investment Advisors Association to carry out the regulated activity of Financial Instrument Business under the Financial Instrument Exchange Law of Japan. In Japan, none of the funds mentioned in this document are registered under the Financial Instrument Exchange Law of Japan or Act on Investment Trusts and Investment Corporations. This document is purely for the information purpose for use by Qualified Institutional Investors defined by the Financial Instrument Exchange Law of Japan.

In Korea, AXA Investment Managers Asia (Singapore) Ltd is a registered Cross Border Investment Advisor/Discretionary Investment Management Company under the Financial Investment Services and Capital Markets Act (the "Act"). The activities referenced under the Act are 5-2-2 Investment Advisory Business and 6-2-2 Discretionary Investment Management Business, respectively. Its financial services are available in Korea only to Professional Investors within the meaning of Article 10 of Enforcement Decree of the Financial Investment Services and Capital Markets Act.

To the extent that any fund is mentioned in this document, neither the fund nor AXA IM Asia is making any representation with respect to the eligibility of any recipients of this document to acquire the units/shares in the fund under the laws of Korea, including but without limitation the Foreign Exchange Transaction Act and Regulations thereunder. The units/shares have not been registered under the Financial Investment Services and Capital Markets Act of Korea, and none of the units/shares may be offered, sold or delivered, or offered or sold to any person for re-offering or resale, directly or indirectly, in Korea or to any resident of Korea except pursuant to applicable laws and regulations of Korea.

In Taiwan, this document is issued by AXA Investment Managers Asia Limited (SFC License No. AAP809), which is authorized and regulated by Securities and Futures Commission. This document and the information contained herein are intended for the use of professional or institutional investors and should not be relied upon by retail investors. They have been prepared and issued for private informational and educational purposes only at the sole request of the specified recipients, and not intended for general circulation. They are strictly confidential, and must not be reproduced, circulated, distributed, redistributed or otherwise used, in whole or in part, in any way without the prior written consent of AXA IM Asia. They are not intended for distribution to any persons or in any jurisdictions for which it is prohibited.

If any fund is highlighted in this communication (the "Fund"), its offering document or prospectus contains important information on selling restrictions and risk factors, you should read them carefully before entering into any transaction. It is your responsibility to be aware of and to observe all applicable laws and regulations of any relevant jurisdiction. AXA IM Asia does not intend to offer any Fund in any country where such offering is prohibited.

The offer, distribution, sale or re-sale of fund units/shares in Taiwan requires approval from and/or registration with Taiwanese regulatory authorities. To the extent that any units/shares of the Funds are not so licensed or registered, such units/shares are made available in Taiwan on a private placement basis only to banks, bills houses, trust enterprises, financial holding companies and other qualified entities or institutions (collectively, "Qualified Institutions") and other entities and individuals meeting specific criteria ("Other Qualified Investors") pursuant to the private placement provisions of the Rules Governing Offshore Funds. No other offer or sale of such units/shares in Taiwan is permitted. Taiwanese purchasers of such units/shares may not sell or otherwise dispose of their holdings except by redemption, transfer to a Qualified Institution or Other Qualified Investor, transfer by operation of law or other means approved by the Taiwan Financial Supervisory Commission.

For Malaysian investors: as the recognition by the Malaysian Securities Commission pursuant to Section 212 of the Malaysian Capital Markets and Services Act 2007 has not been / will not be obtained nor will this document be lodged or registered with the Malaysian Securities Commission, the shares referred to hereunder (if any) are not being and will not be deemed to be issued, made available, offered for subscription or purchase in Malaysia and neither this document nor any other document or other material in connection therewith should be distributed, caused to be distributed or circulated in Malaysia.

For Thailand investors: nothing in this document shall constitute in any manner whatsoever a proposal to make available, offer for subscription or purchase or to issue an invitation to purchase or subscribe for any securities in Thailand or a proposal to implement any of the foregoing in Thailand nor has this document been approved by or registered with the Securities and Exchange Commission of Thailand ("SEC"). No person receiving a copy of this document may treat the same as constituting an invitation or offer to him in Thailand and such person shall not distribute or make available this document in Thailand. The issuer of this document shall not be liable in any manner whatsoever in the event this document is distributed or made available to any person in Thailand receiving a copy of this document. Since no application for approval has been or will be made to the SEC for the offering of the securities, or for the registration of this document, the securities shall not be offered for subscription or purchased or made available, whether directly or indirectly, in Thailand. It is the sole responsibility of recipients wishing to take any action upon this document to satisfy themselves as to the full observance of the laws of Thailand, to comply with all relevant government and regulatory approvals, and to comply with all applicable laws, including but not limited to exchange control laws.

For Investors in People's Republic of China (PRC): this document does not constitute a public offer of the product, whether by sale or subscription in the PRC. The product is not being offered or sold directly or indirectly in the PRC to or for the benefit of, legal or natural persons of the PRC. Further, no legal or natural persons of the PRC may directly or indirectly purchase any of the product or any beneficial interest herein without obtaining all prior PRC's governmental approvals that are required, whether statutorily or otherwise. Persons who come into possession of this document are required by the issuer and its representatives to observe these restrictions.

For Brunei investors: This document has not been delivered to, licensed or permitted by Autoriti Monetari Brunei Darussalam. Nor has it been registered with the Registrar of Companies. This document is for informational purposes only and does not constitute an invitation or offer to the public. As such, it must not be distributed or redistributed to and may not be relied upon or used by any person in Brunei other than the person to whom it is directly communicated and who belongs to a class of persons as defined under Section 20 of the Brunei Securities Market Order, 2013.

For Filipino investors: The shares or units referred to in this document (if any) have not been registered with the Securities and Exchange Commission under the Securities Regulation Code. Any future offer or sale thereof is subject to registration requirements under the Code unless such offer or sale qualifies as an exempt transaction.

For Vietnam investors: This document does not contemplate an offer to sell the interests in any funds in Vietnam. The document has not been approved by the State Securities Commission of Vietnam or any other competent authorities in Vietnam which takes no responsibility for its contents. No offer to purchase the interests in any funds will be made in Vietnam and this document is intended to be read by the addressee only and must not be passed to, issued to, or shown to the public generally. The value of the interests in any funds, the possibility of gaining profit and the level of risk stipulated in this document is purely for reference purposes only and may change at any time depending on market status. Investment in fund(s) does not carry any assurance that investors will make a profit. Investors should themselves carefully balance the risks and the level of those risks before they make any decision to invest in any funds. It is investors' responsibilities to ensure that they are eligible to make investment in any funds. Investors are responsible for obtaining all applicable approvals and complying with requirements under Vietnamese laws.

MSCI: Neither MSCI nor any other party involved in or related to compiling, computing or creating the MSCI data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in or related to compiling, computing or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.
